

BERKIN
ENGINEERING®
Your Trustworthy Partner On Course Of Success

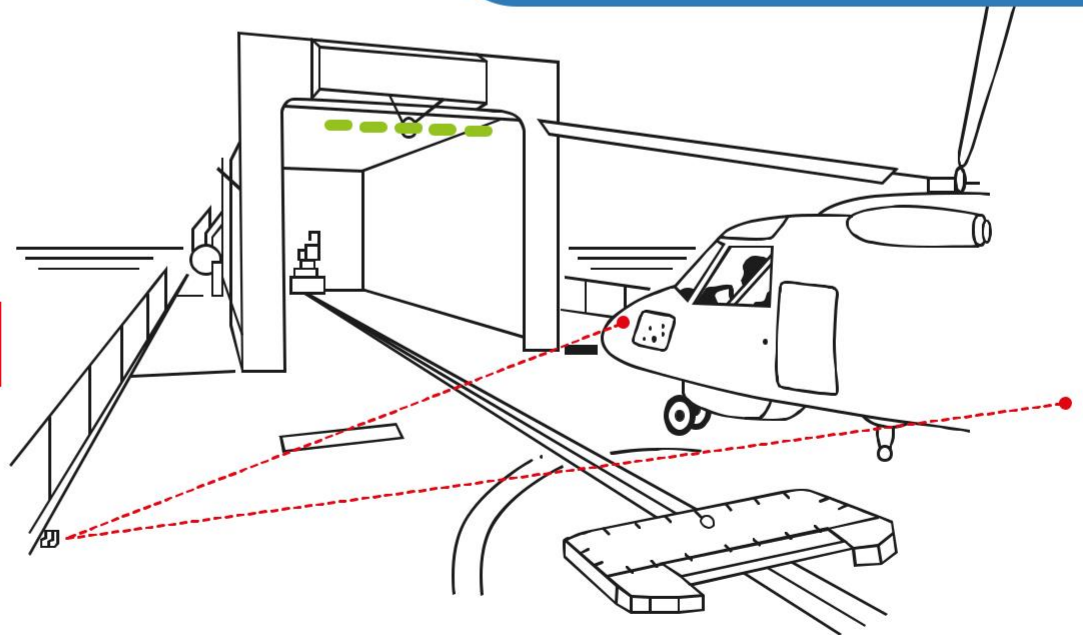

- LIDAR eyesafe, Class-1 905 nm laser,
 - It can be used in all weather conditions,
 - Image Processing and Artificial Intelligence,
 - High position detection sensitivity,
 - Human presence and FOD detection,
 - Independent from active laser sources on the aircraft,
 - Can be used with any aircraft in DB, not just one
 - Compatible with all Aircraft capture systems.

NEW GENERATION AIRCRAFT RECOVERY SYSTEM

LIDAR Based
Aircraft Capture and
Transfer System

**EXISTING SYSTEMS
ARE UPGRADABLE**

A system containing advanced technology level artificial intelligence software, compatible with environmental conditions with the ability to capture all kinds of aircraft that can be uploaded to the database, as opposed to the restriction of a single type of aircraft in existing systems.
